

Awards

The APPA has three awards named for individuals who have made important contributions to the science of psychopathology. They are the Joseph Zubin Award, the Paul Hoch Award and the Eli Robins, Samuel Guze Award. Descriptions of these awards are on our website at: <http://www.appasn.org/awards.htm>

Previous award winners

Year	Hoch Award	Zubin Award	Robins/Guze Award
1990	Arvid Carlsson		
1991	Gerald Russell		
1992	Robert Elston	George Winokur

Scientific Program

Genetic and Environmental Influences on Developmental Psychopathology and Wellness

Tremendous advances have been made in identifying genetic and environmental influences on the development of emotional and behavioral disorders of children and adolescents. The 2007 meeting will address a number of key issues for advancing our understanding of the etiology of child psychiatric illness with a long term goal of improving the way we conceptualize, assess, and treat child psychiatric illness. Presentations will address the remarkable progress the field of developmental psychopathology has made since its inception. Attention will be paid to how techniques in genetic epidemiology, including the study of phenotypic refinement, environmental modifiers, molecular genetic, and endo-phenotypic approaches have advanced our understanding of the etiopathogenesis of common child psychopathology and wellness. The long term aim of the conference will be to propose that the developmental approach, married to the careful study of genetic and environmental contributions to psychopathology will impact on new taxonomies (DSM-V), diagnostic, prognostic and treatment approaches for child psychopathology.
